

INTERNSHIP DESCRIPTION

Web Development/Programming

JOB DESCRIPTION

- Support the Web Developer on staff with our over 20 existing Drupal sites and all websites in progress including but not limited to:
 - Content management
 - Code development
 - Module research
 - Functionality troubleshooting
 - Collaborate on functionality and site structure brainstorming
- Assist web developer and agency team on custom built CRM updates and features
- Complete additional web tasks as assigned.

QUALIFICATIONS

We are looking for an undergraduate student in the Syracuse area who is currently in school and majoring in web development or related field. This person should have excellent website programming and development skills with knowledge of Drupal, and an understanding of php, html, css and mysql. Knowledge of other coding languages such as asp and asp.net and a working knowledge of Adobe Creative Suite are a plus, and will be considered when selecting the internship candidates.

SCHEDULE

2 days a week
8 - 10 hours per week
